SRP: \$19.99
Cost:

Synopsis:

Beneath the waves... secrets run deep.

Sophiane, an ex-French Legionnaire, brings his wife Jazira to a new home: an ancient tower on the open sea. One day while he is sailing, Sophiane finds three little gold nuggets and gives them to her. Soon they begin to deal with daily strange events and the couple begins to face the past that both desired to forget. Things turn out worse than they ever imagined as the gold nuggets are, in reality, gold teeth that belonged to three pirates who now rise from their watery graves to get them back.

DARK WAVES is a fairy tale with dramatic undercurrents. It shows a couple whose love is tested and torn apart by a succession of strange events and recurring nightmares. Pirates, ghostly figures, sea monsters, and golden treasures all enter into the dark action. It's a world redolent of ancient myth, legends, sailors, and the siren call of the ocean.

INTRO TO DANCE FOR BOYS: USING HORTON AND WEST AFRICAN DANCE

Street Date: 8/9/2016
SRP: \$29.99
Cost:

Synopsis:

Tracy Inman, Co-Director of the Ailey School, gives us a fantastic demonstration and learning tool for how to structure a dance class for young boys that is exciting, fun, and challenging; plus how to create an atmosphere of mutual respect, discipline and focus. The first part introduces the boys to the Horton technique, a great technique for young dancers to explore movement and how the body works, with appropriate terminology and positions. The Lester Horton technique uses geometric shapes the young dancers can easily see and understand. The 2nd part, with Yahaya Kamate teaching West African dance, gives the boys the opportunity to let loose, release their energy, and move without restraint. This class is an instructive example of how to introduce boys to a discipline of movement or sport.

INDEPENDENCE FITNESS: ABS & CORE WORKOUT FOR SENIORS

Street Date: 8/23/2016
SRP: \$14.99
Cost:

Synopsis:

When you were younger, you may have done abdominal exercises to make your belly flat or to have a '6-pack' of muscles. Although core and abdomen exercises can help manage belly fat, they are important for so much more. Your core is the center of your body. The stronger the muscles that make up the core, the better off you will be. Made up of your abdomen, lower back, pelvis and hips, your core protects your organs and bones and affects your balance and stability. Core and abdominal exercises can improve posture and balance, protect against back pain and/or injury and reduce your risk of falls. The strength of your core muscles also affects your capacity to lift and the way you walk, stand, squat and sit. When you exercise your core, you also exercise your back and glutes. Abs & Core has both seated and standing workouts. Part of the standing version is done on the floor. For optimal results, you may want to use a resistance band during this routine. Featuring Connie Balcom, ACE-Certified Senior Fitness Specialist.
